

A BARRY-WEHMILLER COMPANY

Filler/Capper Monoblock PSA Filling Technology

Key Features

- Sanitary design
- Touch-screen operator interface
- Positive container handling
- Rapid, easy, no-tool changeover
- No-container/no-fill feature
- Available with Net Weigh, Pneumaflow-Level Sensing, or Mass Flow filling technology
- Accommodates a wide variety of screw caps, press-on caps, plugs, and overcaps
- Motorized turret height adjustment
- Stainless steel barrier guarding with interlocked access doors
- No-container/no-fill/no-cap feature
- Servo, MTU, Pump, Trigger Capping

Filler/Capper Monoblock PSA Filling Technology

PneumaticScaleAngelus introduces monoblocked filler and capper machines – your choice of filler conveniently monoblocked to the Capper. Why choose a monoblocked design? The reasons are simple-smaller footprint, more sanitary environment, and positive container control. All Monoblock machines incorporate a choice of PSA's Capping Technology – capable of performing virtually any capping requirement.

Monoblock machines economize filling room space with a smaller footprint, resulting in cost savings. A Monoblock machine also dramatically reduces the chance of product contamination by immediately capping containers once filled. Direct transfer also reduces spilling. Machine adjustments and performance monitoring couldn't be easier. A user-friendly touch-screen interface allows control of all capper and filler functions, including fault display.

Changeovers are fast, simple, and tool-free with the available Zepf Mark II® change parts. Container and cap changeovers can be performed in less than fifteen minutes! Also, motorized turret height adjustment increases changeover ease.

Series	No. of Filling/ Capping Stations	Pitch	Machine Dimensions	Series	No. of Filling/ Capping Stations	Pitch	Machine Dimensions
900/450	12/6	9.28"	96" x 82"	1800/600	18/6	12.37"	153" x 96"
	16/8	6.96"	96" x 82"		24/8	9.28"	153" x 96"
